projects

1-Arabic Social Reading Website (2023)

- Designed and developed a dynamic social reading platform using Laravel.
- User Authentication: Implemented secure user authentication and authorization systems using Google and Facebook API integration for streamlined login and registration.
- Category-Based Navigation: Organized content into categories, allowing users to explore a diverse range of books, each grouped into distinct categories.

- **Group Functionality:** Introduced a group system where users can create and join groups. Each group incorporates multiple administrators and members, offering a collaborative space.
- **Admin Management:** Empowered group administrators to add, manage, and remove other administrators within the group, ensuring efficient group administration.
- **Real-time Interaction:** Utilized AJAX requests to enable users to create and edit posts, like, and comment on content seamlessly without page reloads, enhancing user engagement.
- **Notification System:** Integrated a robust notification system, keeping users informed about updates, comments, and interactions within their groups and across the platform.

2-Torood System (2023).

- Backend developer for Torood/Gaza, a Node.js and React.js-based delivery management system.
- Integral in developing features for client, driver, and store interactions.
- Ensured smooth order processing and delivery scheduling.
- Handled client queries, maintaining high satisfaction.
- Collaborated in Agile environment for efficient product delivery.

3-Middle East Equine Auction (<https://meeauction.com>) (2024)

- Utilizing Laravel Passport for authentication.
- Integrating Firebase Realtime Database.
- Building Filtering Api.
- Sending Email and SMS for Auction Winner.
- Implemented Angular.js within the frontend dashboard to manage the dispatch of SMS and email message to Auction winner.
- Send OTP Code for Customer.

Languages

- Arabic-native language
- English -C1
